

<b>Date of entry:</b>	22-10-22
<b>What have you done on your project this week?</b>	Searched PubMed for papers on OxyR – 839 hits
<b>What have you found difficult? (How do you intend to ameliorate this? How can you grow? Can you create a bullet point for your CV from this?)</b>	didn't understand some things
<b>What has been a success?</b>	Found a database with some information about OxyR regulation, GenExpDB
<b>What files/data have you produced? (are they stored securely and labelled clearly?)</b>	Edited thesis intro: saved file as thesis-intro-draft-01_Oct22_MF – in “Documents” endnote library file updated with new papers read started to make figure 1 – model of OxyR regulon (draft)
<b>What is the objective for next week?</b>	Analyse OxyR regulon using the GenExpDB – and by continuing to search the literature
